

PROJECT ROADMAP

Delano offers an end-to-end full service, beginning with understanding your game and your goals. It's by your inspired development and our gaming manufacturing expertise, we'll assist you making your dream come true. You can see our Roadmap to completion below, which guides you through each process along your manufacturing journey. Come adventure with us today!

PREPRESS

Our artwork team ensures your files are print-ready.

DIGITAL PROOFS

We provide you with digital proofs for your review before production begins.

SAMPLES

We are happy to send you samples for review before running high quality prints.

PROOFING

Our design team sends you physical proofs for approval prior to any production run.

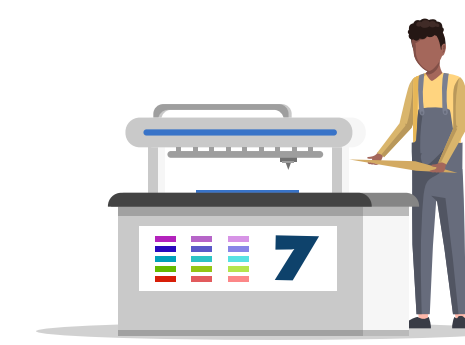

SOURCING

Dice and all other non-printed game components are selected and procured.

PRINTING

All digital assets are printed on high quality stock to ensure the best gameplay experience possible.

MOUNTING/FINISHING

Prints are precision mounted to production cardstock or cardboard right before the die cutting process.

DIE CUTTING

All game components are precision cut to exact specifications.

ELEMENTAL PROTECTION

Board game components are cured to prevent damage or warping caused by environmental conditions.

MASS PRODUCTION COPY

The most exciting part of the process is being able to see a mass production copy (MPC) of the game when the print run has been finalized.

KITTING

All parts, pieces are packed into the box, shrink wrapped, and secured as the final part of the production process. Made ready for retail.

FULFILLMENT

We have the capability to fulfill your games out of our warehousing.

SHIPPING

Games are boxed up and shipped to the destination(s) of your choosing.

Our team has decades of combined experience and we've worked with thousands of creatives such as yourself, new start-ups and long standing, well-known companies in the game industry. Our expertise and strong partnerships are what keep the referrals flourishing and long-time relationships coming back to play with us!
